

WEEKLY UPDATE ON NATURAL DISASTERS IN ASEAN PLUS THREE

No. 445

26 November - 2 December 2025

Indonesia

Heavy rainfall devastated Indonesia, killing at least 604 people. As of 1 December 2025, torrential rainfall battered large parts of Sumatra in Indonesia, causing landslides and flooding. At least 604 people died, 464 were still missing, and 2,600 were injured. The worst devastation occurred in North Sumatra, where at least 283 people were confirmed dead. More than 1.5 million people were affected, and roughly 570,000 people were evacuated to shelters with limited access to clean water and electricity. Local governments struggled to restore communications and reach communities cut off by collapsed bridges, impassable roads, and damaged power lines.
